## 1 Solución

---

## 1 Solución

# Solución

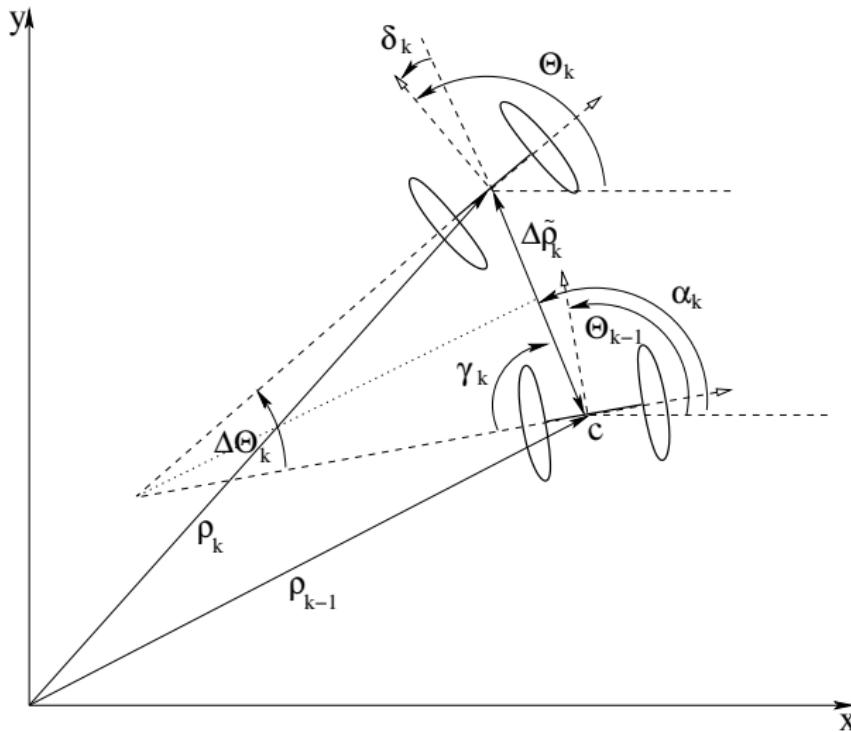

$$\Delta\theta_k = (\Delta U_{r,k} - \Delta U_{l,k})/b$$

$$\Delta\rho_k = (\Delta U_{r,k} + \Delta U_{l,k})/2$$

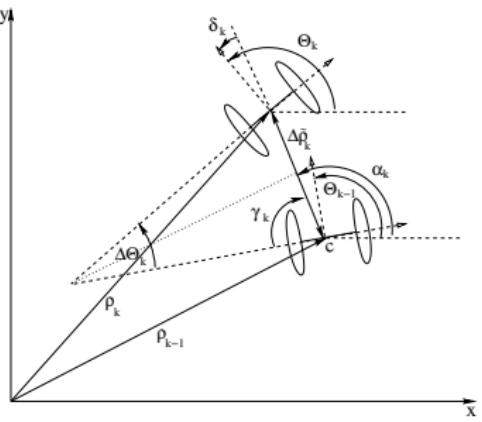

$$\Delta\tilde{\rho}_k = (r_k + b/2) \cdot 2 \cdot \sin(\Delta\theta_k/2)$$

# Solución

$$\mathbf{x}_{k-1} = [ \begin{array}{ccc} x_{k-1} & y_{k-1} & \theta_{k-1} \end{array} ]^T \quad (1)$$

$$\mathbf{x}_k = \left[ \begin{array}{c} x_{k-1} + \Delta \tilde{\rho}_k \cos(\alpha_k) \\ y_{k-1} + \Delta \tilde{\rho}_k \sin(\alpha_k) \\ \alpha_k + \delta_k \end{array} \right] \quad (2)$$

$$\gamma_k = \pi/2 - \Delta\theta_k/2 \quad | \quad \delta_k = \pi/2 - \gamma_k \quad (3)$$

$$\alpha_k = \pi - \gamma_k + (\theta_{k-1} - \pi/2) = \theta_{k-1} + \Delta\theta_k/2 \quad (4)$$

$$\mathbf{x}_k = \mathbf{x}_{k-1} + \left[ \begin{array}{c} \Delta \tilde{\rho}_k \cos(\theta_{k-1} + \Delta\theta_k/2) \\ \Delta \tilde{\rho}_k \sin(\theta_{k-1} + \Delta\theta_k/2) \\ \Delta\theta_k \end{array} \right] \quad (5)$$
